

PASADENA, CA – OCTOBER 2015. Obsolescence announcement.

Kinometrics is announcing End-of-Life of the Seismic Switch Model **Mitigator IND**. The Mitigator IND was introduced as an industrial grade version of the Mitigator, featuring three components and designed to reliably shut down elevators, escalators and other industrial critical equipment during a strong earthquake. Kinometrics decided to discontinue the Mitigator IND effective February 28, 2015.

The Mitigator will continue to be supported through February 28, 2018.

Kinometrics suggests the new Seismic Switch Model **Mitigator+ IND** instead. The new version was designed to meet the following standards and codes: ASCE 25-97, ASME A17.1 and CA Code 3137.
